

Eudaimonia

Introduction to Using Modern AI Tools

09/17

Lecture A: 10,000-ft view of using AI tools	5 minutes
Break	2.5 minutes
Lecture B: Examples of AI products	5 minutes
Break	2.5 minutes
Technical Workshop: Setup programming environment	20 minutes
Break	5 minutes
Oral Quiz	5 minutes

Homework: Extending your programming environment; thinking about your own AI tool

09/24

Lecture A: What is an interface?	5 minutes
Break	2.5 minutes
Lecture B: Examples of AI interfaces	5 minutes
Break	2.5 minutes
Technical Workshop: Use <code>curl</code> to request images from DALL-E and text from ChatGPT	20 minutes
Break	5 minutes
Oral Quiz	5 minutes

Homework: Mastering the `curl` command

10/01

Lecture A: Playing 20 Questions with ChatGPT	5 minutes
Break	2.5 minutes
Lecture B: Analysis of ChatGPT's game of 20 Questions	5 minutes
Break	2.5 minutes
Technical Workshop: Write code to analyze ChatGPT's memory	20 minutes
Break	5 minutes
Oral Quiz	5 minutes

Homework: Seeing if ChatGPT can think of a number and stick to it

10/08

Lecture A: Tasks AI is really good for	5 minutes
Break	2.5 minutes
Lecture B: Examples of AI successfully completing a task faster than humans	5 minutes
Break	2.5 minutes
Technical Workshop: Generating documents with ChatGPT	20 minutes
Break	5 minutes
Oral Quiz	5 minutes
Homework: Writing code to create a LaTeX document with AI-generated questions	

10/15

Lecture A: Training an AI for a specific purpose	5 minutes
Break	2.5 minutes
Lecture B: Examples of AIs trained for specific purposes	5 minutes
Break	2.5 minutes
Technical Workshop: Write a python script to train an OpenAI model	20 minutes
Break	5 minutes
Oral Quiz	5 minutes
Homework: Training an AI to write like you	

10/22

Lecture A: Structured Data	5 minutes
Break	2.5 minutes
Lecture B: Most common ways of sending data over a network	5 minutes
Break	2.5 minutes
Technical Workshop: Write code to ask ChatGPT to complete some structured data	20 minutes
Break	5 minutes
Oral Quiz	5 minutes
Homework: Creating pixel art with ChatGPT	

10/29

Lecture A: Random numbers	5 minutes
Break	2.5 minutes

Lecture B: Why can't ChatGPT generate good random numbers?	5 minutes
Break	2.5 minutes
Technical Workshop: Graph random numbers generated by ChatGPT	20 minutes
Break	5 minutes
Oral Quiz	5 minutes
Homework: Drawing a frequency graph of ChatGPT's random animal names	

11/05

Lecture A: AI ecosystem and infrastructure	5 minutes
Break	2.5 minutes
Lecture B: How various big companies use AI	5 minutes
Break	2.5 minutes
Technical Workshop: Identifying AI Usage in your favorite software product	20 minutes
Break	5 minutes
Oral Quiz	5 minutes
Homework: Writing a report on how your favorite software product uses AI	

11/12

Lecture A: There are AIs other than ChatGPT	5 minutes
Break	2.5 minutes
Lecture B: The differences between Grok and ChatGPT	5 minutes
Break	2.5 minutes
Technical Workshop: Use <code>curl</code> to request images from and text from Grok	20 minutes
Break	5 minutes
Oral Quiz	5 minutes
Homework: Generate a picture of your favorite characters using Grok	

11/19

Lecture A: Periodic Tasks	5 minutes
Break	2.5 minutes
Lecture B: Delegating periodic tasks to AI	5 minutes
Break	2.5 minutes
Technical Workshop: Writing python code to send a random e-mail every morning.	20 minutes

Break	5 minutes
Oral Quiz	5 minutes
Homework: Including a picture in your random e-mails.	

11/26

Lecture A: Self-improving AI	5 minutes
Break	2.5 minutes
Lecture B: The limits of self-improvement	5 minutes
Break	2.5 minutes
Technical Workshop: Building an e-mail AI that adjusts itself based on responses	20 minutes
Break	5 minutes
Oral Quiz	5 minutes
Homework: Writing another e-mail AI to respond to your first one.	

12/02

Lecture A: Project discussion	5 minutes
Break	2.5 minutes
Lecture B: Project discussion	5 minutes
Break	2.5 minutes
Technical Workshop: Working on project together	20 minutes
Break	5 minutes
Oral Quiz	5 minutes
Homework: Work on your project	

12/09

Lecture A: Project discussion	5 minutes
Break	2.5 minutes
Lecture B: Project discussion	5 minutes
Break	2.5 minutes
Technical Workshop: Working on project together	20 minutes
Break	5 minutes
Oral Quiz	5 minutes
Homework: Work on your project	

Lecture A: Project discussion	5 minutes
Break	2.5 minutes
Lecture B: Project discussion	5 minutes
Break	2.5 minutes
Technical Workshop: Working on project together	20 minutes
Break	5 minutes
Oral Quiz	5 minutes
Homework: Work on your project	

Terminal Commands Mastered in Course

ls

cd

mkdir

cat

curl

rm

touch

grep

pipenv

nvim

brew

apt

Python Keywords Mastered in Course

import

from

False

True

async

await

def

if

else

elif

for

in

not

and

or

pass

return

while

Terminology Mastered in Course

string	integer	float	API	function	directory
RGB	API key	ASCII	command	operating system	asynchronous
software	hardware	boolean	list	index	iteration
AI Model	ChatGPT	Grok	network	GPU	Moore's Law

Skills Acquired in Course

variable usage	if-else statements	loops	functions	terminal usage
API usage	python
